SUMMARY

Certified AWS Solutions Architect designing secure, high-performance architectures. Expert in automating DevSecOps workflows using Terraform, CFN, and Github Actions to deliver scalable infrastructure, robust cloud security, and peak operational excellence.

EXPERIENCE

Senior Solutions Architect

Digico Solutions **July 2025 – Present, Beirut. Lebanon (Hybrid)**

- Led a cross-functional team of 8 DevOps and AI Engineers to deliver 5+ end-to-end solutions for startups and SMBs. Managed the full SDLC and enforced internal SOPs, resulting in a 20% increase in on-time delivery and consistent adherence to high-quality production standards.
- Spearheaded presales technical discovery for 10+ high-value startups. Accelerated AWS cloud adoption by positioning services on the AWS Marketplace and securing Service Delivery Programs, elevating the firm's standing in the AWS partner ecosystem.
- Streamline enterprise deployments by developing modular Terraform and CloudFormation templates, leveraging GitHub Actions for CI/CD to manage scalable containerized environments across Amazon ECS and EKS.
- Secure client environments through Landing Zones, security hardening and automated cloud operations, implementing robust monitoring, automated patching, and cost optimization strategies that significantly reduced client overhead.

DevSecOps Engineer

Neo Mena Technologies **December 2023 – July 2025, Beirut, Lebanon (Hybrid)**

- Gained experience in configuring Github workflows for unit testing, linting, security testing and deployments across multiple environments.
- Tackled 60+ infrastructure and API security items assessed internally and by 3rd party (Deloitte, Panacea, Archer).
- Planned and implemented a Grafana/Prometheus monitoring solution using terraform, SSM documents and docker-compose.
- Applied cloud cost-optimization measures resulting in 15% cost cut, including EC2/RDS reservations and Fargate/spot instances setup.
- Configured various 3rd party automations, including Slack to GH deployments, ments, GH to Jira issues mapping and GH to Cypress integration.
- Deployed 20+ Batch jobs and Lambda functions leveraging SAM and EventBridge and used as cronjobs, ETL jobs, alerting services and scanners.

Technical Support Specialist

EXFO **May 2021 – October 2023, Quebec, Canada (Remote)**

- Ensured 99.9% uptime for high-traffic telecom platforms by resolving over 200 critical production incidents, directly impacting service reliability for millions of active users.
- Streamlined CI/CD and container orchestration via Kubernetes and Helm, building custom observability dashboards that accelerated the incident feedback loop by 30% and prevented recurring bottlenecks.
- Led cross-functional patching initiatives between DevOps and R&D, implementing a standardized troubleshooting framework that reduced manual intervention by 15 hours per week.

Full Stack Developer

PropertyCard.com **December 2020 – May 2021, London, UK (Remote)**

- Architected a GCP-based microservices backend (5+ services) using Express.js to manage a 1M+ property dataset; implemented an indexing strategy between PostgreSQL and Elasticsearch that maintained sub-200ms search latency under concurrent load.
- Leveraged Next.js Server-Side Rendering (SSR) to programmatically enable SEO crawling for a 1M+ listing catalog and accelerated First Contentful Paint (FCP) using React, Redux Toolkit, and MUI.

EDUCATION

Bachelor in Computer and Communication Engineering

Islamic University of Lebanon • 2015-2020

CERTIFICATIONS

Kubestronaut (5x Kubernetes Certified)

CNCF • 2026

AWS Golden Jacket (12x Certified)

Amazon Web Services • 2025

HashiCorp Terraform Certified Associate

HashiCorp • 2024
